

#	Species	Information
1.	Bonobo	<div>relative widths</div> <p>The Bonobo (English pronunciation: /bʰnoʔboʔ/[3][4] /ʔbʰnʔboʔ/[5]), Pan paniscus, previously called the Pygmy Chimpanzee and less often, the Dwarf or Gracile Chimpanzee, [6]is a great ape and one of the two species making up the genus Pan. The other species in genus Pan is Pan troglodytes, or the Common Chimpanzee. Although the name "chimpanzee" is sometimes used to refer to both species together, it is usually understood as referring</p>
